

THE COALITION FOR BUZZARDS BAY

2009 Annual Report

TO OUR MEMBERS AND FRIENDS

We have both spent our lives behind islands, on opposite sides of Buzzards Bay. John in West Falmouth and Mark in Fairhaven. From the beach at Chappaquoit Island at the mouth of West Falmouth Harbor, West Island in Fairhaven seems to rise up out of the Bay on a clear day – a great forested mass standing in front of the mainland. From West Island Town Beach, Chappy is invisible – hidden within the high moraine that runs down the spine of Bourne and Falmouth to Woods Hole.

We fell in love with the waters, saltmarshes, beaches and tidal flats of our own places long before we ventured across Buzzards Bay to explore the land in the distance. In the past decade, however, we have both come to know and love each others 'sides' of the Bay.

We no longer only see Fairhaven and Falmouth; West Falmouth Harbor and Nasketucket Bay; Chappaquoit and West Islands. We see Buzzards Bay – its watershed lands, its 17 unique towns and city, and its constant presence at the heart of our region's quality of life and economy. And like everything that someone loves, we are more aware of its vulnerabilities and feel compelled to protect and care for it.

This is why we – like so many of you – have been drawn together by The Coalition for Buzzards Bay: the only region-wide organization dedicated to the protection and restoration of the entire Bay. We are part of a growing movement of people, organizations and businesses

all working to create a clean and healthy future for Buzzards Bay and the watershed in which we all live, work and play.

The work highlighted in this Annual Report – like the Bay itself – recognizes no municipal boundaries and spans the entire region. Whether it is creating new models for reducing the nitrogen pollution that is killing our Bay, defending our shores from the threat of another oil spill, preserving critical inland forests and wetlands, or proactively working to restore the Bay's rivers, the efforts of The Coalition for Buzzards Bay go where the Bay needs us most.

And our work has never been more in demand in all corners of Buzzards Bay than it is right now. Despite serious, well-documented declines in the health of the Bay, each day we watch inadequate pollution control and local land use laws continue to allow the situation to worsen. Each day, we call for more action, educate decision-makers, proactively protect land and clean up sources of pollution. Like turning a massive ship drifting off course, we are slowly and steadily working to create a different future for this Bay and our local environment.

It is our pleasure, then, to present the challenges and victories highlighted in this Annual Report. Your support makes all of it possible and we thank you! We hope you are proud of what we are accomplishing together and that you'll encourage your friends and family to get involved – regardless of where it was that they first fell in love with Buzzards Bay.

Mark P. Rasmussen
President/Buzzards Baykeeper

John D. Ross
Chair, Board of Directors

Guardian Awards and Boston Harbor Cleanup Success Highlight 21st Annual Meeting

The 2009 Buzzards Bay Guardian Awards were presented at The Coalition for Buzzards Bay's 21st Annual Meeting on May 21, 2009 at historic Highfield Hall in Falmouth to Laurell Farinon of Acushnet, the West Falmouth Boat Club, and State Senate President Therese Murray. At the meeting, the Coalition also recognized Attorney Marc Deshaies of New Bedford for his outstanding volunteer commitment to the organization.

The Buzzards Bay Guardian Award is the highest honor granted by The Coalition for Buzzards Bay. A Buzzards Bay Guardian must demonstrate outstanding service in the clean-up, restoration or protection of the Bay. Their work may be as a citizen volunteer, as an organization, or as a public official or employee. This work may involve education, advocacy, community activism, or indeed any activity that furthers the health of the Bay. Most importantly, a Buzzards Bay Guardian is an unsung hero or heroine who deserves public recognition, not only for what they have achieved but to inspire others to make a difference.

Keynote Speaker for the Meeting was author Eric Jay Dolin who spoke about his book Political Waters: The Long, Dirty, Contentious, Incredibly Expensive but Eventually Triumphant History of Boston Harbor and the lessons that cleanup might hold for dealing with the nitrogen pollution problem on Cape Cod and in Buzzards Bay.

CBB President Mark Rasmussen

BAYKEEPER[®] ADVOCACY

Strong advocacy on behalf of the Bay and its Watershed are at the core of The Coalition for Buzzards Bay's efforts to protect and restore the region's environment. In 2009, our Baykeeper[®] advocacy program continued its focus on reducing nitrogen pollution to the Bay's harbors and coves and watchdogging the implementation of strict oil spill prevention rules.

Reducing Nitrogen Pollution

Nitrogen pollution is the greatest threat to the health of Buzzards Bay. More than half of the Bay's harbors and coves are suffering from the poor water clarity, bad odors, and loss of shellfish and other marine life associated with excessive nitrogen from inadequate wastewater disposal and poorly-planned development. Addressing the nitrogen pollution crisis is the top advocacy priority of the Coalition and important steps were taken throughout the watershed in 2009.

■ The largest source of nitrogen pollution to Buzzards Bay is residential septic systems, and not just failing old systems and cesspools, but even modern Title 5 septic systems. In 2009 the Coalition produced a newsletter **alerting homeowners that properly functioning Title 5 septic systems are a major source of nitrogen pollution to Buzzards Bay** and discussing alternative treatment options. View it at www.savebuzzardsbay.org/title5newsletter.

■ On the Bay's largest river, the Weweantic, the Coalition is working with the town of Carver, the Cape Cod Cranberry Growers Association, and the University of Massachusetts Cranberry Station to **update old 'Best Management Practices' guidelines for cranberry growers to better manage nitrogen fertilizers**. In 2009, the Coalition also produced a fact sheet for cranberry growers and watershed residents about the adverse impacts that nitrogen pollution is having on the Weweantic. View it at www.savebuzzardsbay.org/restoreweweantic_factsheet.

■ The Coalition continues to work to ensure that the **"River Run" and "Tihonet Mixed Use" developments proposed by the A.D. Makepeace Company** comply with the intent of last year's decision by the MA Secretary of Energy & Environmental Affairs Ian Bowles that the River Run development be "Nitrogen Zero". Under that precedent-setting decision, the development's 1,100 residential units and commercial development will not be allowed to increase nitrogen pollution to the already-degraded Agawam River in Plymouth and Wareham.

■ The storage of **sewage in 20 acres of open, unlined earthen lagoons at the Marion Wastewater Treatment Plant** is a unique practice in the Buzzards Bay Watershed with the potential to leach nitrogen pollution into the groundwater and eventually into the Bay. Water quality in Sippican Harbor, less than a mile from the lagoons, has declined over the past decade. In 2009, the Coalition began an investigation in partnership with the town to learn if these two issues might be related. We have undertaken a detailed field study to determine if the lagoons are leaching pollution and if that pollution is reaching the Harbor. The results will guide cleanup efforts in the year to come.

■ The Coalition has launched a consensus-building process aimed at building support for measures to clean-up the serious nitrogen pollution degrading Wareham's coastal waters. Various groups in the town have proposed nitrogen-reducing bylaws at town meeting but none have succeeded. With the help of facilitator David Straus, the **Wareham Nitrogen Consensus is bringing together more than 50 town residents to craft and build support for concrete measures to reduce nitrogen pollution from both residential septic systems and cranberry bogs**. We hope that the collaborative process being developed will not only move Wareham toward healthier waters, but also inspire other communities to take similar action.

Wareham residents are coming together to develop concrete steps the town can take in 2010 to reduce nitrogen pollution.

BAYKEEPER® ADVOCACY

Preventing Oil Spills

The Coalition for Buzzards Bay continues to lead a strategic campaign to protect our coast from the 2 billion gallons of petroleum that transits the Bay each year by strengthening federal marine regulations, implementing new state laws, and defending prevention measures in court. We have made great progress in the wake of the 2003 Bouchard 120 Oil Spill. Our work today is focused on the effective implementation and enforcement of new laws regulating oil barges in the Bay.

■ After securing the most critical oil spill prevention measure needed to protect the Bay – **tugboat escorts and local pilots on all oil barges transiting Buzzards Bay** – in a 2008 state law, we were forced to draft clarifying legislation following a misinterpretation of the bill by the state Department of Environmental Protection. The resulting new version of the bill was passed by the MA Legislature and signed by Governor Patrick in September 2009.

■ The Coalition finalized an **oil spill response plan for Quissett Harbor** which provides the detailed information needed to protect the harbor in the event of a spill, such as identification of sensitive areas, required equipment, roles and responsibilities, and response options. As part of the project, permanent anchor pins and moorings were set at key locations on the Harbor to aid in the quick deployment of oil booms. Development of the plan was supported by the Quissett Harbor Preservation Trust.

Other Actions

■ In December, the state Executive Office of Energy and Environmental Affairs released the **Massachusetts Ocean Management Plan**, the first of its kind in the country. The purpose of the plan is to balance the protection of marine wildlife and habitats with potential ocean uses such as renewable energy development. The draft plan was released in June 2009 and The Coalition submitted comments calling on the plan to be revised to better protect the Bay. In the end, we were pleased to support the plan which provides greater protections for Buzzards Bay's special, sensitive, and unique resources like the endangered Roseate Tern and eelgrass beds by directing development away from those areas. It also **bans large-scale wind farms** like the one previously proposed by Boston developer Jay Cashman.

■ Our *R/V Buzzards Baykeeper* provided summer pump-out service to boaters on Cuttyhunk Island two and often three days each week **keeping nearly 2,000 gallons of sewage pollution out of the Bay** and educating boaters about clean boating practices.

Bay & Watershed Monitoring

The Coalition continued its commitment in 2009 to strong science in order to better understand the Buzzards Bay ecosystem and its response to human-related impacts, and to guide restoration and protection efforts. Our **Baywatchers program completed its 18th year** and has become the largest, most comprehensive volunteer coastal water quality monitoring program in New England.

In addition to coastal water quality, Coalition monitoring programs expanded upstream into the watershed's rivers and primary tributaries.

■ Providing the information needed to better document and understand the collapse of River Herring populations throughout the Buzzards Bay Watershed, Coalition staff and volunteers **monitored the spring herring run on the Agawam, Wankinko, and Acushnet Rivers** for the 4th consecutive year with electronic fish counters.

■ The health of **important Bay tributary streams** was monitored by Coalition staff and volunteers with river flow and temperature gauges on the Mattapoisset and Acushnet Rivers. Data is entered into a statewide database maintained by the MA Riverways Program.

Heidi Blythe

Baywatcher Volunteers monitor all corners of the coastline to track changes in Bay health and guide cleanup efforts.

The Coalition for Buzzards Bay is a member of the Waterkeeper Alliance®, an international collaborative of nearly 200 Bay, River and Soundkeeper organizations. Baykeeper is a registered trademark and service mark of Waterkeepers® Northern California and is licensed for use herein.

Baywatchers Program Returns to Woods Hole

New Partnership Launched between The Coalition for Buzzards Bay and the MBL

This past May, more than 130 citizen scientists manned their stations on docks and bridges and in rowboats and whalers at sites along the entire length of Buzzards Bay's jagged coastline. They carried sampling poles and toolboxes full of lab vials, thermometers and secchi disks to measure Bay health. It was the eighteenth consecutive spring that they marched out at dawn to defend their favorite stretch of Buzzards Bay.

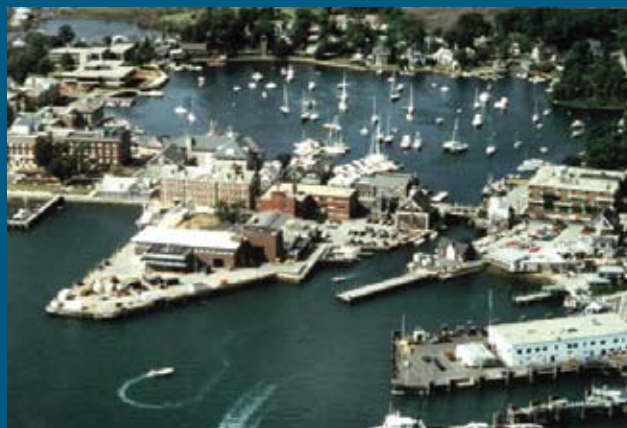

As the backbone of the Coalition's Baywatchers Program, these volunteers continue to build one of the most comprehensive coastal water quality databases in New England and the primary source of long-term data assessing the health of each of the Bay's 30 major harbors and coves. The information they provide is absolutely critical to the development of informed, science-based decisions about the restoration and protection of Buzzards Bay at all levels of government.

Focusing on the impacts of nitrogen pollution in the harbors and coves of Buzzards Bay, it is the only continuous program tracking the impacts of watershed development on the health of the Bay. Data collected over the life of the program reveals that 1/2 of Buzzards Bay's harbors and coves are degraded due to excessive nutrient loading from their watersheds.

Baywatchers was established in 1992 by The Coalition for Buzzards Bay, the Buzzards Bay National Estuary Program and scientists from the Woods Hole Oceanographic Institution (WHOI). After four start-up years in the Biology Department at WHOI, science support and laboratory analysis for the program was moved to the University of Massachusetts School for Marine Science and Technology (SMAST) under the direction of Dr. Brian L. Howes, where it operated for the next 11 years. During this time, the program grew to become one of the most respected volunteer monitoring programs in the nation.

Beginning in 2009, the Baywatchers Program began a new chapter through a partnership with the Ecosystems Center at the Marine Biological Laboratory (MBL Ecosystems Center) in Woods Hole, MA under the direction of Dr. Hugh Ducklow, Senior Scientist and the Center's Director. MBL has taken on all science support and laboratory analysis for the program and will build upon the solid science foundation laid by SMAST.

Commenting on the new partnership, Coalition President Mark Rasmussen said, "We are very excited to be working

with Hugh and his lab at The Ecosystems Center to continue to grow the Baywatchers Program. Their experience with coastal ecosystems not only on Cape Cod, but throughout the world, will be an enormous help as we seek to expand the use of the program's data with government officials to restore Bay health."

The MBL Ecosystems Center will use comparable field sampling approaches, analytical methods and quality control parameters as employed at SMAST. These procedures are commonly used by the Ecosystems Center scientists for their measurement of water quality in a variety of programs such as the Plum Island Ecosystem Long Term Ecological Research (LTER) site on the Massachusetts North Shore, Palmer Long Term Ecological Research (LTER) project in Antarctica, The Arctic LTER at Toolik Lake, Alaska, ongoing ecosystem monitoring in Boston Harbor, ongoing NOAA-NERRS ecosystem research in Waquoit Bay, and many other federally-supported programs.

MBL Ecosystems director Hugh Ducklow remarked, "The partnership with Baywatchers opens a new chapter in environmental research at MBL. We feel very strongly about providing this service to citizens in the Buzzards Bay region, and we're excited about expanding our research on coastal ecology in New England. We look forward to working with the Coalition and its many dedicated volunteers."

WATERSHED PROTECTION

The health of our Bay, river and drinking water quality is intimately linked to the state of our watershed forests and wetlands. The Coalition's Watershed Protection efforts are aimed at accelerating permanent land preservation efforts in the Buzzards Bay Watershed by initiating and managing acquisitions of land and conservation restrictions (CRs) and by expanding the capacity of local land trusts through staff and financial assistance. This work also includes land stewardship – ongoing care for the protected lands under our management – and active restoration of degraded wetlands and streams throughout our Watershed.

In 2009, more than 700 acres of critical lands were protected through the Coalition's efforts and exciting new restoration efforts undertaken on two of the Bay's most important rivers.

This Water is for Drinking

The Mattapoissett River Valley is one of the highest priorities for land protection in the entire Bay watershed. Providing clean drinking water to more than 24,000 people in the towns of Marion, Mattapoissett, Rochester and Fairhaven, the river and its aquifer demand healthy forests and wetlands to filter pollution and sustain adequate water yields for both people and the river's fish and wildlife.

In 2009, the Coalition continued its commitment to protecting the lands of the Mattapoissett River Valley in partnership with the four towns and the regional Mattapoissett River Valley Water Supply Protection Advisory Committee. **Under the Coalition's leadership, a total of 69 acres of land were permanently protected in Fairhaven, Mattapoissett and Rochester** including: the purchase of the critical 30-acre Rounseville forest in Mattapoissett, the donations of CRs on 13 acres near the river by Bruce & Diana MacPhail in Rochester and 18 acres by John & Linda Gurney on the Rochester-Mattapoissett town line, and a purchase of an 8-acre woodlot on New Boston Road in Fairhaven.

The generous gift by the Gurney family was the result of their participation in a Coalition-hosted workshop in April highlighting the significant federal tax benefits available to landowners who donate land for permanent conservation.

A Soccer Forest Protected

Over the past decade, the Coalition has been instrumental in the protection of 710 acres of land along the coastline and within the watershed to one of the region's most sensitive and naturally-diverse waterways: Nasketucket Bay in Fairhaven and Mattapoissett. Moving inland to protect the forests and wetlands that straddle the Nasketucket River, the bay's primary freshwater stream, the Coalition partnered with the Town of Fairhaven to continue this work by purchasing the **44-acre Nasketucket**

Where our drinking water starts its journey to our taps.

Woods parcel adjacent to the regional Mariner Youth Soccer Field complex to be preserved and opened to the public for passive recreation.

Protecting the Carver Great Cedar Swamp

Much of the water that flows to Buzzards Bay begins its journey far inland in the watershed's deep forested wetlands. And at the headwaters to the Weweantic River, a full 10 miles from the shores of the Bay, lies one of the largest such wetlands: the 600-acre Carver Great Cedar Swamp. In a focused effort to increase protection for this unique wetland resource, the Coalition worked with the town of Carver this year to develop and implement a strategy to better understand the complex ownership of land parcels in this area and bring more of the swamp into protected conservation status. This resulted in **two landowners donating 20 acres for conservation and the Carver Town Meeting voting to transfer 100 acres from general municipal ownership to protected conservation commission ownership.**

And in Dartmouth and Marion...

With penalty funds made available for land protection through the 2003 Bouchard 120 Oil Spill and managed by the Coalition, we assisted the Dartmouth Natural Resources Trust with the purchase of land and conservation restrictions on **107 acres of coastal forest, saltmarsh and islands on the Slocums River** from the Spindler and Koch families.

The Sippican Lands Trust (SLT) **permanently protected a large block of forest in the watershed to Aucoot Cove by donating a CR on the 238-acre property** to the Coalition. The CR protects wildlife habitat, opens up trails for public use, and preserves water quality in downstream Aucoot Cove.

Allen Decker of the Coalition's Watershed Protection staff surveys the protected saltmarsh at the Spindler property.

WATERSHED PROTECTION

Conservation Financing Aids Local Deals

Through our Bay Lands Revolving Fund, the Coalition continues to finance land protection deals throughout the Watershed. In 2009, we made **\$364,000 in loans to the Wareham Land Trust and the Sippican Lands Trust** for three new projects seeking to protect 7.5 acres along the Agawam River and on Marks Cove in Wareham and 363 acres of forestland in the watershed to Aucoot Cove in Marion.

Successful Partnership Boosts Land Protection in Wareham

Through a partnership with the Wareham Land Trust, the Coalition shares our Land Protection and Restoration Specialist Heidi Blythe and supports her in her work to **advance important land protection projects** in the town. This year, the WLT closed on the acquisition of 21 acres of land for protection and continued to shepherd the exciting 300-acre Great Neck Conservation Project to a successful completion.

Land Stewardship

As the Coalition continues to protect important lands of the Bay's Watershed, we take on **increasing responsibility for the stewardship of these preserved areas**. This year our staff and representatives from our partner land trusts visited

Volunteers from the 6th grade at Dartmouth's Friend's Academy take a break from a day cleaning up the shoreline at the Coalition's Marsh Island property in New Bedford Harbor.

all 14 properties upon which we hold conservation restrictions. Annual monitoring compares the existing conditions observed to those recorded at the time the CR was acquired to assure that conservation values are being upheld. This year the Coalition's Board of Directors adopted official procedures for monitoring of conservation restrictions to guide our stewardship into the future.

The Slocum River's scenic beauty is preserved by the Koch Conservation Restriction

WATERSHED PROTECTION

Where the Acushnet River Meets the Harbor

The Coalition **added an extra layer of permanent protection to the 19-acre Acushnet Sawmill property** we acquired in 2007 by granting a Conservation Restriction to the town of Acushnet Conservation Commission. The CR ensures that the land will always remain open and available to the public while allowing for the removal of buildings and asphalt along the riverbank and restoration of the river's natural edge. With more than 4 acres of buildings and pavement to be removed, the Acushnet Sawmill property will serve as a model for the restoration of other damaged wetland areas.

Marsh Island to be Saltmarsh Again

The Coalition is supporting the development of a comprehensive restoration of saltmarsh and tidal creeks on Marsh Island – a 21-acre peninsula that juts into New Bedford Harbor from the Fairhaven shore. The property once held one of the Harbor's largest saltmarshes but it was filled with dredge spoils during the 1930s and 40s. Under the plan being led by the New Bedford Harbor Trustees Council and paid for with toxic polluter penalty funds, **all fill will be removed and the saltmarsh re-created** in 2010-2011.

As part of the restoration project, the Fairhaven-Acushnet Land Preservation Trust donated the south side of the peninsula to the Coalition this year for ongoing care and stewardship.

Bringing Fish Back to the Sippican

Each spring as river herring and other fish make their way out of the Bay and into freshwater streams for spawning, the ones that choose the Sippican River quickly find their route to upstream ponds blocked by two dams at Hathaway and Leonards Ponds. The Coalition is **leading an effort to open up these dams to fish passage**. At Leonards Pond Dam, we are supporting the town, MA Fisheries and Wildlife, and Alewives Anonymous in the design and construction of a new fish ladder. And at the lower Hathaway Pond Dam, we acquired a grant from American Rivers to evaluate options for potentially removing part of the failing dam. This study is underway and will guide future action to restore the Sippican.

The Coalition is supporting an effort to restore the Sippican River, seen here at Eastover Farm in Rochester.

TREASURER'S REPORT

FISCAL YEAR 2009 (JULY 1, 2008 - JUNE 30, 2009)

Despite the challenges facing all nonprofit organizations in 2009 due to the national recession, The Coalition for Buzzards Bay had a strong year thanks to the wonderful generosity of its membership and supporters – both new and old. At June 30, 2009, the Coalition's net assets nearly doubled to close the year at \$6.6 Million.

As a key component to our annual budget, we are very pleased to see growth in our membership due in large part to an unprecedented \$500,000 matching grant from an anonymous donor challenging us to increase our membership from 5,000 to 8,000 before the end of 2010. The increase - which broke 6,200 members by the end of calendar year 2009 - also resulted in a 10% increase in membership revenues over the prior year.

As expected, we continued to see a decline in government grants as the land protection and restoration projects funded by the \$6.7M in penalty funds related to the 2003 Bouchard Oil Spill near completion. These funds have resulted in the protection of more than 1,000 acres across the watershed as well as wetlands restoration projects.

It is truly an exciting time to be serving as Treasurer of this entrepreneurial, energetic and vitally important organization. The challenges facing Buzzards Bay demand much greater financial resources than ever before, and I'm proud to see our members, supporters, staff and Board of Directors rising to meet them.

Copies of audited financial statements are available upon request.

Samuel P. M. Gray
Treasurer

REVENUE	FY2009	FY2008
Donations	\$4,299,038	\$816,743
Memberships	202,838	183,390
Government Contracts	758,323	1,873,215
Events	76,094	144,925

Total Expenses	\$2,167,374	\$3,129,763
Increase in Net Assets	\$3,249,673	\$2,568
Ending Net Assets	\$6,550,264	\$3,300,590

The FY2009 and FY2008 Financial Statements were audited by the firm of Hodgson, Pratt & Associates PC, New Bedford, MA.

All of the Bay protection and restoration achievements featured in this Annual Report were made possible through the generosity of The Coalition for Buzzards Bay's members—the individuals, families, foundations, businesses, and organizations that support our work on behalf of the Bay and its watershed. The Board and Staff of The Coalition for Buzzards Bay extend our deepest appreciation to everyone who joined us in Saving Buzzards Bay in 2009.

The Gosnold Society recognizes individuals who support the ongoing programs of The Coalition for Buzzards Bay with annual gifts of \$1,000 or more. We thank them for their generosity and commitment to our work, and invite others to join them in supporting the preservation of Buzzards Bay.

Membership Challenge

With a goal of engaging more people in the work of saving Buzzards Bay, a wonderfully generous donor challenged us in 2008 to more than double our membership base! The two-year challenge, beginning in 2009 was to increase our membership by 3,000 people (1,000 in 2009 and 2,000 in 2010). When (not if!) successful, we will earn \$500,000 to support the programs of the Coalition. We are at the halfway point and have achieved the first year's challenge of 1,000 new members. We are deeply grateful to the many members and supporters of the Coalition who reached out to their friends, family members and work associates to join the Coalition. With Introductory Membership starting at \$10, we hope that everyone who lives, works and plays in the Buzzards Bay Watershed will join our shared effort to save Buzzards Bay and get us to our goal of 2,000 new members in 2010.

Watershed Ride 2009

Natalie Garfield

The third annual Watershed Ride was held on October 4th with 56 cyclists and dozens of volunteers. Cyclists experienced the perfect cycling weather that comes to our watershed at this time of year. Riding 76 miles from Horse-neck Beach in Westport to Quissett Harbor near Woods Hole, the event helped create awareness of the importance of our watershed lands to the Bay's health and to raise funds for the programs of the Coalition. Gary Johnson of Mattapoisett earned the yellow Watershed Ride jersey as the top fundraiser by raising over \$1,780. The Ride set a new record by raising nearly \$37,000. 2010's Ride will be held on Sunday, October 3rd – so mark your calendar now and get out on that bike this summer to train.

Swim Buzzards Bay 2009

A record 118 swimmers had a great swim on a pristine day at the 16th Annual Swim Buzzards Bay. And, each and every one helped raise awareness and funds for the Bay. Swimmers from ages 13 to 76 navigated the 1.2-mile course across Outer New Bedford Harbor swimming from Davy's Locker Beach in New Bedford to Fort Phoenix State Beach in Fairhaven with the help of a fleet of kayak escorts, and state and local authorities. Matt Shenker of Pocasset regained his hold on first place with a new all-time record of 20:40 and 15-year-old Mara Honohan of New Bedford set a new record as the fastest female with a time of 23:30.

The Wheeler Cup, recognizing the fastest team was claimed by Team SCA, which included Jonathan Haisman of Dartmouth, Jaren Hawxwell and Tara Hawxwell both of North Dighton, won with a time of 23:44. Joining the Cuttyhunk Club to celebrate their 10th Swim Buzzards Bay were Nancy Smith of Dartmouth and Rhea Teves-Cate of Fairhaven. John Bullard of New Bedford, Jim Dorsey of Westport, David Lapalme of Dartmouth, Kendra Medina of Marion, Smoky Moak of New Bedford, Douglas Olney of Brooklyn, NY, and Matt Shenker joined the Six-Mile Club by completing their 5th Swim.

This year's Swim raised a record \$42,000 in support of the Coalition's research, conservation, advocacy, and education programs. Former Coalition Board member, newest member of the Cuttyhunk Club and Fairhaven resident Rhea Teves-Cates continued her reign as the Swim's top fundraiser with over \$3,120 in sponsorship donations.

The 17th Annual Swim will be held on Saturday, July 31, 2010.

The Buzzards Bay Center

John Robson

Building Green for New Bedford and the Bay

New Coalition Headquarters renovation underway in New Bedford Waterfront Historic District

This past summer, The Coalition for Buzzards Bay broke ground on the renovation of the historic Coggeshall Counting House on the New Bedford waterfront to serve as the organization's permanent home and Buzzards Bay Center. The building's highly-visible location will allow the Coalition to reach many more people and raise regional awareness about the threats facing Buzzards Bay.

Once complete, the Center will not only provide ample space for the Coalition's growing team of conservation professionals and contribute to the organization's financial stability, it will also help educate the public about the challenges facing the Bay and engage local citizens in environmental issues through the "Richard C. Wheeler Bay Learning Center" to be located on the ground floor.

Eager to establish the Buzzards Bay Center as the region's most environmentally-responsible building renovation, the Coalition is utilizing the best green, energy-efficient technology from its 'recycling' of a dilapidated city building all the way up to its vegetated roof and solar panels. When complete, the Center is expected to require approximately half the energy needed to heat, cool and light a typical commercial building of similar size.

Completion is expected in June 2010.

Westport Chiropractic
Westport River Watershed Alliance
Sarah Williams
YMCA Southcoast
YSI Incorporated
Heather Zine

THE COALITION FOR BUZZARDS BAY is dedicated to the restoration, protection and sustainable use and enjoyment of our irreplaceable Bay and its Watershed. The Coalition works to improve the health of the Bay ecosystem for all through education, conservation, research and advocacy.

2009 BOARD OF DIRECTORS

John D. Ross, West Falmouth, Chairman
Tom Gidwitz, Dartmouth, Vice-Chairman
Samuel Gray, Wareham, Treasurer
William Locke, Cataumet, Clerk
John K. Bullard, New Bedford
Seth Garfield, Cuttyhunk
Laura Ryan Shachoy, Esq., Marion
Gary Johnson, Mattapoisett
Russell Keeler, Rochester
Morris Kellogg, Dartmouth
Richard Morse, Esq., Woods Hole
Louise Mauran Nadler, Marion
Chris Reddy, PhD., Falmouth
Sandra Stuart Wheeler, Wareham

OUR VISION

- ♦ A Bay shoreline defined by safe swimming beaches, open shellfish beds, and stretches of scenic open spaces for all to enjoy.
- ♦ Healthy waters that support abundant fish, shellfish, and wildlife populations.
- ♦ A Bay safe from the threats of oil spills, industrial and sewer discharges, and ocean dumping.
- ♦ A watershed where rivers, streams, inland forests, and wetlands that buffer the Bay are protected.

STAFF

Mark Rasmussen, President/Buzzards Baykeeper

Advocacy

Korrin N. Petersen, Esq., Vice-President, Advocacy
Casey Allen, Boat Captain
Kerri Murphy, Esq., Advocacy Specialist
