

# Planning Boards: Decriminalize This Road!

# PLANNING BOARDS: STOP WASTING DEVELOPER'S MONEY!

Low Impact

## Make LID Roads Legal

Low Impact Development has less pavement, which means less stormwater. Stormwater infiltrated into rain gardens and other vegetated areas removes more pollutants than groundwater infiltration basins alone.

Conventional

Conventional development and unnecessarily wide roads creates tremendous volumes of stormwater that is typically directed by curbs to drainage systems discharging to surface waters and wetlands, degrading the environment. This road is the real crime.

## **ADOPT LOW IMPACT DEVELOPMENT REGULATIONS NOW!**

**LID=Narrower Roads, Less Infrastructure,  
Less Maintenance, and Less Cost to Taxpayers**

**LID=Cleaner Surface Water & Groundwater &  
A Healthier Environment**

LID workshop 12:00, May 24, 2006 Marion, MA
